SUMMARY

Web Developer with strong foundations in Laravel, React, PHP, and MySQL, building secure, responsive, and scalable web applications. Experienced with authentication, CRUD, REST APIs, and modern front-end tooling. Passionate about clean code, performance, and delivering smooth user experiences.

SKILLS

React, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Next.js, Vite

PHP, Laravel (Sanctum for Auth), REST APIs, GraphQL, JWT

MySQL, SQL, Database Design & Management

Git, GitHub, Docker, Postman, Stripe API

WordPress, WooCommerce, Elementor, WPForms, YayCommerce

Object-Oriented Programming (OOP), Data Structures & Algorithms, C++, Java

Communication, Team Collaboration, Time Management, ProblemSolving, Adaptability, Attention to Detail, Critical Thinking, Self-motivation

Arabic, English

EXPERIENCE

Full-Stack Developer Intern

CodeClause   Aug 2024 – Sep 2024

· Built 10 REST endpoints in Laravel/PHP and integrated MySQL queries; added 2 indexes that cut a slow query from 260 ms to 160 ms (38% faster).
· Delivered 8 React components/forms with client-side validation; fixed 12 bugs via code reviews; merged 8 PRs.
· Created a Postman collection with 25 requests for regression testing.

Full-Stack Developer Intern

CodeAlpha   Jun 2024 – Sep 2024

· Implemented 7 Laravel routes/controllers and updated 4 DB tables; verified with 20 Postman tests.
· Built 10 reusable React components and state flows; improved Lighthouse Performance from 78 to 88 on key pages.
· Closed 15 sprint tasks (tickets) and wrote setup/API docs used by new interns.

EDUCATION

Bachelor of Computer Science

Alexandria University · 2022-2026 · 3.69

PROJECT

Storelt | Cloud-based File Storage & Management System

· Built a secure web app for uploading, organizing, and accessing documents, images, and videos from any device.
· Designed 27 DB tables and 6 REST endpoints for auth, uploads, folders, tags, and search.
· Built 24 React components; added role-based access and server/client validation.
· Demo dataset: 50 test users, 500 files; Postman suite of 30 requests.
· Tech: PHP (Laravel), MySQL, React, Tailwind CSS, Vite.

Luzura | E-Commerce Platform

· Constructed a scalable e-commerce solution featuring product catalogs, user accounts, shopping carts, and secure checkout, processing over 1000 transactions in the first month with a 99.9% uptime.
· Shipped catalog, cart, checkout, and admin CRUD: 18 endpoints, 28 React components.
· Integrated Stripe (test mode) with webhook handling; achieved 90% checkout success in QA.
· Added pagination and server-side filtering, lowering product API payload size by 40%
· Tech: PHP (Laravel), MySQL, React, Tailwind CSS, Vite.
