

ABDULLAH SOBHY

MERN Full-Stack Engineer

Alexandria, Egypt • (+20)155-032-8625 • [Gmail](#) • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

SUMMARY

Build and architect full-stack platforms as a full-stack developer specializing in Laravel and Next.js/React, with hands-on experience from database design to deployment. Delivered a 50+ table LMS and job board platform with 100+ REST API endpoints and 8 third-party integrations, coordinating 28 developers as Group Leader. Skilled in TypeScript, REST/GraphQL APIs, and secure authentication (Laravel Sanctum, JWT).

SKILLS

Frontend Development: React, Next.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Vite.

Backend Development: Node.js, Express, PHP, Laravel, REST APIs, GraphQL, JWT.

Databases: MySQL, SQL, Database Design & Management.

Tools & DevOps: Git, GitHub, Docker, Postman, Stripe API, Socket.io, Pusher.

CMS & E-Commerce: WordPress, WooCommerce, Elementor, WPForms, YayCommerce.

Programming Fundamentals: Object-Oriented Programming (OOP), Database Management Systems (DBMS).

Programming Languages: Python, Java, C++.

Professional Skills: Communication, Team Collaboration, Time Management, Problem-Solving, Adaptability, Attention to Detail, Critical Thinking, Self-Motivation.

Languages: Arabic (Native), English (Professional Working Proficiency)

WORK EXPERIENCE

Full-Stack Developer Intern - Digital Egypt Pioneers Initiative (DEPI)

July, 2025 – December, 2025

Edvance - ACE Platform (New System) | Access to Careers & Education

Honors: [React Frontend Web Developer Achievement](#) | [Team Leader Appreciation](#) | [Top Student Award](#)

- Developed a comprehensive platform combining a job board and a Learning Management System (LMS) using the ACE (Access to Careers & Education) framework, bridging the gap between university students' academic skills and professional opportunities.
- Architected and implemented full-stack solution with Next.js 15, React 19, TypeScript, Tailwind CSS (frontend) and Laravel 12, PHP 8.2+ (backend); designed normalized database schema with 50+ tables supporting 6 distinct user roles (Students, Teachers, Parents, University Students, Companies, Admins).
- Built 100+ RESTful API endpoints for authentication, job postings, course management, applications, payments, and real-time features; integrated Laravel Sanctum for secure token-based authentication and role-based access control.
- Integrated 8 third-party services: DIDIT for identity verification, Google Gemini AI for career mentoring, JSearch API for external job listings, Mailgun for academic email OTP verification, Jitsi for live streaming, Stripe & PayPal for payments, and Pusher for real-time notifications.
- Implemented advanced features including AI-powered CV analysis and job recommendations, web scraping for external job data, live video classes with attendance tracking, multi-language support (Arabic/English), and a comprehensive notification system.
- Led a 4-member Agile development team as Team Lead while serving as Group Leader overseeing 28 developers across the DEPI cohort. Delivered a fully functional platform on Vercel with complete API documentation and technical documentation.

Frontend Developer

October, 2025 – December, 2025

International Knowledge Academy - Egypt

- Built a comprehensive LMS platform using React, Next.js, TypeScript, and Tailwind CSS for an educational institution.
- Architected a reusable codebase with 3 foundational file structures (types, services, hooks), ensuring maintainability and scalability.
- Implemented role-based interfaces for 4 user types: Teacher, Assistant, Student, and Admin with distinct dashboards and permissions.
- Optimized application performance through code splitting, lazy loading, and efficient state management.

WordPress Developer

September, 2025 – October, 2025

ZidClean - Cleaning Services Platform - Saudi Arabia

- Developed a full-featured cleaning services platform for the Saudi Arabia market covering home, villa, pool, furniture, and AC cleaning services.
- Built 150+ pages, including 120 SEO-optimized blog posts; implemented Google Search Console indexing and on-page SEO best practices.
- Integrated Stripe and PayPal payment gateways with custom PHP modifications to payment plugins for localized checkout flow.
- Customized Elementor layouts and form plugins with PHP backend modifications; delivered full project in 5 days under a tight deadline.

PROJECTS

Space Tourism - [Live Link](#)

Space Tourism – Responsive Multi-Page Website

- Developed a responsive multi-page website using HTML, CSS, JavaScript, and JSON Server, faithfully implementing a modern space tourism interface.
- Integrated mock REST API data, interactive navigation, and responsive layouts to deliver a seamless experience across desktop, tablet, and mobile devices.

YouTube Clone - [Live Link](#)

YouTube Clone – Responsive Video Streaming Platform

- Developed a responsive YouTube clone using Vite, Tailwind CSS, and JavaScript, closely replicating the original interface and user experience.
- Integrated JSON Server to simulate a REST API, enabling dynamic video rendering, search functionality, and interactive UI behavior.

StoreIt - [Showcase Video](#)

StoreIt – Cloud File Storage & Management SystemClone – Responsive Video Streaming Platform

- Built a full-stack cloud storage application using Laravel, PHP, MySQL, and TypeScript, enabling users to securely upload, organize, and manage files.
- Developed a responsive front end with HTML, CSS, and TypeScript, while implementing a secure backend with authentication and file management features.

JustPost - [Showcase Video](#)

JustPost – Quora-style Q&A Platform

- Developed a full-stack Q&A platform using Laravel, PHP, Blade, MySQL, JavaScript, and SCSS, allowing users to create, edit, delete, and browse posts with threaded comments.
- Implemented secure authentication, image uploads, user profiles, and email notifications while delivering a responsive and intuitive interface.

LUZURA - [Showcase Video](#)

LUZURA – Full-Stack E-Commerce Platform

- Built a complete e-commerce application using Laravel, PHP, Blade, MySQL, JavaScript, HTML, and CSS, featuring authentication, product management, and shopping cart functionality.
- Implemented full CRUD operations, responsive product browsing, and an administrative dashboard for efficient product and inventory management.

Resume Builder - [Showcase Video](#)

Resume Builder – Online Resume Generator

- Developed a responsive resume builder using HTML, CSS, and JavaScript, allowing users to create professional resumes from multiple templates.
- Implemented real-time preview and dynamic content generation to provide a fast and intuitive resume creation experience.

CERTIFICATES & INTERNSHIPS

- | | |
|---|--------------------------------|
| 1. Code Alpha Internship: Certificate Letter Of Recommendation | June, 2024 – September, 2024 |
| 2. Code Clause Internship: Certificate Letter Of Recommendation | August, 2024 – September, 2024 |
| 3. Digital Egypt Pioneers Initiative (DEPI): Completion Achievement Team Leader Appreciation Top Student Award | July, 2025 – December, 2025 |

EDUCATION

Bachelor of Science in Computer Science	July, 2022 – July, 2026
Faculty of Science, Alexandria University with GPA: 3.62/4.00 • Graduated with Honors Degree	

HOBBIES

1. **Jogging**
2. **Nature-related and outdoor activities**
