Object-Oriented Programming (OOP), Data Structures & Algorithms, C++, Java

Communication, Team Collaboration, Time Management, Problem-Solving, Adaptability, Attention to Detail, Critical Thinking, Self-motivation

Arabic, English

WORK EXPERIENCE

Frontend Developer

International Knowledge Academy - Egypt

Oct 2025 - Dec 2025

- Built a comprehensive LMS platform using React, Next.js, TypeScript, and Tailwind CSS for an educational institution. Architected reusable codebase
- with 3 foundational file structures (types, services, hooks) ensuring maintainability and scalability. Implemented role-based interfaces for 4 user types: Teacher, Assistant, Student, and Admin with distinct dashboards and permissions. Optimized application performance through code splitting, lazy loading, and efficient state management.

WordPress Developer

ZidClean - Cleaning Services Platform - Saudi Arabia

Sep 2025 - Oct 2025

- Developed a full-featured cleaning services platform for the Saudi Arabia market covering home, villa, pool, furniture, and AC cleaning services. Built 150+ pages, including 120 SEO-optimized blog posts; implemented Google Search Console indexing and on-page SEO best practices. Integrated Stripe and PayPal payment gateways with custom PHP modifications to payment plugins for localized checkout flow. Customized Elementor layouts and form plugins with PHP backend modifications; delivered full project in 5 days under a tight deadline.

Full-Stack Developer Intern - Digital Egypt Pioneers Initiative (DEPI)

Edvance - ACE Platform (New System) | Access to Careers & Education

Jul 2025 – Dec 2025

- **Honors:** [React Frontend Web Developer Achievement](#) | [Team Leader Appreciation](#) | [Top Student Award](#)
- Developed a comprehensive platform combining a job board and a Learning Management System (LMS) using the ACE (Access to Careers & Education) framework, bridging the gap between university students' academic skills and professional opportunities.
- Architected and implemented full-stack solution with Next.js 15, React 19, TypeScript, Tailwind CSS (frontend) and Laravel 12, PHP 8.2+ (backend); designed normalized database schema with 50+ tables supporting 6 distinct user roles (Students, Teachers, Parents, University Students, Companies, Admins).
- Built 100+ RESTful API endpoints for authentication, job postings, course management, applications, payments, and real-time features; integrated Laravel Sanctum for secure token-based authentication and role-based access control.
- Integrated 8 third-party services: DIDIT for identity verification, Google Gemini AI for career mentoring, JSearch API for external job listings, Mailgun for academic email OTP verification, Jitsi for live streaming, Stripe & PayPal for payments, and Pusher for real-time notifications.
- Implemented advanced features including AI-powered CV analysis and job recommendations, web scraping for external job data, live video classes with attendance tracking, multi-language support (Arabic/English), and a comprehensive notification system.
- Collaborated with a 4-member development team following Agile methodology; delivered a fully functional platform deployed on Vercel with complete API documentation, video presentation, and technical documentation.

EDUCATION

Bachelor of Computer Science

Alexandria University • 2022-2026

GPA • 3.67
